WHY SEAS 4.0?
Educational excellence of Naval Architects and Marine Engineers (NAME) in an International and multidisciplinary context, entirely taught in English.

Jointly developed by the University of Napoli Federico II, University of A Coruna, University of Zagreb and the Technical University of Hamburg.

One year-and-half-long (90 ECTS), for students with 240 ECTS in NAME or other technical degree.

Double master degree from UNINA and UDC.

OBJECTIVES
To train future engineers and increase their competitiveness in ship design, construction and management.

SEAS 4.0 couples environmental and legal competences, green and sustainable economy and digitalisation related to Industry 4.0 in shipbuilding and maritime transport.
